Partnership Proposal: Embedded Financial Infrastructure for Asanetic

To: Leadership & Engineering Team, Asanetic
From: Centy Money Services
Subject: Monetizing Your Software Platforms via Centy Money Network

1. Executive Summary

Asanetic builds exceptional software solutions for enterprises and growing businesses. By integrating financial workflows directly into your existing software applications, you can unlock high-margin, recurring financial revenue streams while significantly boosting customer retention and platform utility.

Centy Money Services provides the core embedded financial infrastructure, regulatory rails, and banking integrations that power the Centy Money Network. By connecting Asanetic's platforms to our network, your applications can seamlessly embed banking, credit, identity, and payment capabilities—enabling Asanetic to share in transaction fees, onboarding revenue, and financial service margins generated by your end-users without the heavy burden of regulatory licensing.

2. Platform Overview: Centy Money Network

The Centy Money Network acts as an intelligent financial middleware layer connected directly to Tier-1 banking rails and mobile network operators.

- **Direct Bank & Payment Integrations:** We manage regulatory compliance, licensing overhead, and core banking integrations so your team can focus on software product delivery.
- **Smart Credit Engine:** Our proprietary intelligence layer evaluates transactional data in real time to automate risk profiling, credit underwriting, and complete loan lifecycle management.

- **Developer-First Architecture:** Asanetic engineers gain access to clean, RESTful APIs and SDKs to embed complex financial services into web or mobile apps with minimal code footprint.
- **Enterprise Security & Compliance:** Built with end-to-end encryption, tokenized transactions, and automated AML/Sanctions screening to safeguard client operations.

3. Monetization Architecture for Asanetic

By embedding Centy Money Services into your digital products (ERP, HR, Payroll, CRM, or Supply Chain software), Asanetic earns recurring commissions and fee splits across multiple high-value modules.

Revenue & Capability Matrix

Financial Service Module	Embedded Capabilities	Revenue & Earnings Model for Asanetic
Payments & Payouts	• In-app B2B & B2C payment collection• Bank-to-wallet & bulk disbursement rails	**Transaction Fee Split:** Earn a fixed fee or percentage margin on every payment processed through your platforms.
Identity & Verification	• Automated employee & vendor KYC• Real-time ID checks & background screening• Integrated HR/ERP onboarding flows	**License & SaaS Markup:** Bundle identity verification into platform software licenses or charge per-verification markups.
Supplier Financial Hub	• Instant supplier onboarding & verification• Automated supplier payout settlement• Early invoice discounting & payables financing	**Commission on Financing:** Earn a commission on total invoice volume discounted/financed, plus fee splits on supplier payouts.

Financial Service Module	Embedded Capabilities	Revenue & Earnings Model for Asanetic
Capital & Working Credit	• Employee salary advances & personal lending• Stock & inventory financing for merchants• Fixed-asset acquisition loans	**Origination & Interest Split:** Earn an origination fee split on every loan disbursed via our automated banking credit engine.
Tax & Compliance Engine	• Automated VAT, withholding tax, and payroll tax filing• Direct connection to official tax authority processing rails	**Per-Filing Processing Fee:** Charge per-transaction or recurring monthly compliance processing fees embedded in accounting workflows.

4. Technical Integration & Developer Support

Integrating with the Centy Money Network requires minimal developer effort:

1. **Unified API Suite:** A single set of API credentials and endpoints unlocks payments, identity verification, supplier payouts, and credit facilities.
2. **Webhooks & Event Streams:** Real-time webhooks provide instant updates for payment completions, KYC approval statuses, and loan disbursements.
3. **Sandbox Environment:** Complete mock sandbox environments for rapid testing, prototyping, and end-to-end flow validation prior to live production deployment.

5. Partnership Roadmap

1. **Discovery & Use-Case Mapping:** Identify which Asanetic software platforms have immediate opportunities for embedded fintech (e.g., HR, ERP, e-commerce, or supply chain tools).
2. **API Sandbox Provisioning:** Issue sandbox keys, API documentation, and pre-built code samples to the Asanetic engineering team.
3. **Revenue Model Finalization:** Establish exact commission splits, fee schedules, and custom pricing structures per module.

4. **Go-Live & Co-Selling:** Deploy embedded services to active software clients and share in recurring transaction revenue from day one.

Next Steps

We would love to schedule a **30-minute technical discovery session** with the Asanetic product and engineering leadership next week to demonstrate the Centy Money Network APIs and run through revenue share projections for your active software products.

Please let us know your availability, or feel free to reach out directly to schedule a call.
